

6 X 15" D STYLE WHEELS

Finely detailed recreation of the famous classic Dunlop racing wheels, stirring memories of Le Mans in the 1950s and 1960s and lots of British Racing Green.

Manufactured as a one piece unit, the D Style wheel faithfully replicates the brake cooling perforation pattern of the Dunlop racing wheels fitted to such icons as the D Type and lightweight E Type Jaguars, amongst other great competition cars. The wheel is die cast in aluminium and finished in silver powder coat with clear lacquer.

The 6 x 15" D Style wheel is available in four or five stud bolt-on, standard 42mm centre lock or peg drive fixings, providing alternatives to suit all MGAs, MGBs, MGCs or V8s. Spinners are not included with the centre lock wheels, but peg drive wheels include plate and pegs. Bolt-on wheels may be easily and dramatically enhanced with dummy spinner sets (see recommendation below).

Easy to fit. The choice of bolt-on, centre lock or peg drive wheels ensure an exact match with the original wheel fixings on your MG.

Basic hand tools required. Once the tyres are fitted to the wheels, only the standard car tool kit is required to fit the wheels to the car.
