

CHROME WHEEL NUT 'MG' LOGO MGB

Top quality chromed wheel nut for all steel wheel fitted MGBs from 1970 onwards, featuring a neat embossed 'MG' logo.

Designed to match the classic Rostyle steel wheel fitted to all non-wire wheel MGBs from 1970 onwards, this wheel nut is also the correct item to use with the Club eight spoke alloy wheels on both MGB and MGC models. If fitting alloy wheels to a pre-1970 (i.e. pre-Rostyle) MGB, note that the original tool kit wheel brace will not fit this wheel nut - a later MGB or replacement brace will be required.

Sixteen required per MGB, or twelve if also using a Club locking wheel nut set (twenty or sixteen for Club alloy wheel fitment on an MGC).

Easy to fit. Simply replace each old wheel nut with a new one, one at a time. Take the opportunity while you're doing the job to smear a small amount of anti-sieze compound or copper grease on each wheel stud.

Basic hand tools required. All you need is your car's wheel brace or a torque wrench.
