

TYRE LETTERING PEN

Yes, they may be stereotyped as being the preserve of owners of large 4x4s and yes, white lettered tyres might be seen as producing a bit of a transatlantic image... but then there's nothing wrong with that - quite the opposite. MG is after all 'the sportscar America loved first' and driving an MG along California's Pacific Coast Highway is one of those fantastic experiences of a lifetime!

Practise your 'tyre art' by highlighting the brand (if you've bought Club Yokohamas, why not flaunt them?). It's deceptively easy to do - just follow the moulded letter outlines on the tyre with the pen to brighten the look of your tyres. Everyone else will think you had it done professionally!

For the full custom effect evocative of the 1960s, also take a look at the Club's white wall and white band tyre trims (see recommendation below).

Easy to use. Simply draw over the moulded letters on the tyre side wall.

No tools required.
