

ROSTYLE WHEEL RENOVATION KITS

At last a simple Do-It-Yourself cure for tatty Rostyle wheels! No more spending hours cutting the masking tape just so to match the complex black and silver design of this attractive and evocative MG wheel.

The Club's Rostyle wheel renovation kit includes twenty five accurately die cut self adhesive spraying masks (sufficient to mask each design facet on all of your MG's wheels), plus two aerosols of silver wheel paint, one aerosol of satin black paint and three sheets of wet and dry paper, for perfect results.

Rostyle wheel renovation kits are available for the 14" Rostyle wheels found on steel wheel MGBs and GTs from 1970 onwards, or the 13" Rostyles found on Midgets from 1972 onwards (but not the early type Midget Rostyle fitted between 1970 and 1971).

Easy to use. Self adhesive masks make a joy out of the painting process - a professional finish too. Remember as always that painting time is nine tenths preparation, one tenth painting - the more rubbing down and prep work you do, the better the result will be.

Basic hand tools required. Wire brush plus a scraper (old screwdriver will do) to remove rust blisters etc. before rubbing down with wet and dry paper. Lintless cloth with a small amount of thinners to remove rubbing down dust, finger grease marks etc. before painting.
