

ANTI THEFT 'MG' VALVE CAP SET

Stylish chrome plated hexagonal section valve caps incorporating 'MG' logos and unobtrusive anti-theft locking screws.

Sold as a set of four, complete with watchmaker's style screwdriver for the locking screws, the anti theft valve caps will fit all MGs with standard type tyre valves.

Easy-grip hexagonal shape makes for hassle-free removal. Internal rubber seals effectively seat the caps securely on the tyre valves, preventing ingress of dust or other road dirt. The seals also guard against seizure of the caps on the valves, a well known problem with some older accessory metal valve cap designs.

01954 231318

Easy to fit. Screw the cap in place on the valve, then tighten the locking screw on the side.

No tools required. Other than the screwdriver supplied in the valve cap set.
