MOHAIR HOOD MGA 1500 (ONE WINDOW)

Black mohair hood in one window style originally fitted to earlier MGA 1500s. Later MGA 1500s and all MGA 1600s originally had three window style hoods, i.e. including rear quarter windows. The two styles of hood are however completely interchangeable, so unless original appearance is important it's perfectly feasible, for instance, for the owner of an early MGA 1500 to benefit from the extra vision afforded by fitting a later three window hood.

Mohair is a tightly woven fabric usually found on luxury convertible cars comprising three layers: a weather-resistant layer, a rubberised waterproof membrane and an interior lining. While the standard colour for an MGA mohair hood is plain black, a choice of colours and contrasting coloured bindings is available as a special order - please contact the MGOC Spares sales team for more information.

All MGA hoods offered by the Club feature the improved weatherproofing brought about by dielectrical seam welding, a manufacturing process introduced midway through MGA 1500 production.

High degree of skills required. While Club hoods are supplied ready for DIY fitting, professional fitment is recommended for MGAs, due to the skills and experience needed. The Club offers a hood fitting service, by appointment, at the Club H.Q. Your local automotive trimmer may also be able to carry out the task for you, but it is advisable to ensure first that they have prior experience of MGA hood fitting.

Basic hand tools required. Craft knife, bradawl, chalk and tape measure, crosshead and flat bladed screwdrivers. The tools are basic, but carrying out the job isn't (see comments above).
