

2 EARED PLYWOOD SPINNER SAVER

A great idea for all owners of MGs with 2 eared spinners, the plywood spinner saver will serve you well by completely protecting spinners from flaking chrome and bruising from the first time you use it.

It's such a simple design, having 'ears' to hit with a hammer to undo or tighten the spinners, but even using the correct soft-faced lead or copper hammer the damage soon builds up - such a shame, especially with new spinners. The plywood spinner saver absorbs the hammer's impact instead of the spinners and the long handles increase the leverage meaning you don't have to strike such a heavy blow in the first place.

The 2 eared plywood spinner saver only costs about two thirds of the price of one of the spinners on the car, so it doesn't take long to pay for itself in 'saved' spinners!

Easy to use. Certainly easier than aiming the hammer at the ears on the spinner, with the main benefit of not inflicting damage on them.

Basic hand tools required. Just the hammer from the car's tool kit.
