

### 3 EARED SPINNER WITHOUT LOGO

Top quality chromed 3 eared spinner, available in RH side (LH thread) or LH side (RH thread) versions to fit on 12 or 8 threads per inch (TPI) wire wheel hubs.

12 TPI spinners are for use on all earlier wire wheel MGs: MG T Types, MGAs, plus MGBs, Midgets and Sprites up to 1964 approximately. 8 TPI spinners are for 1964 approximately onwards MGBs, Midgets and Sprites, plus MGCs. If you have an MGB, Midget or Sprite from 1963-65, it is advisable to count the number of threads per inch on your splined hubs before placing an order.

3 eared spinners were not original fitment on MGs but they make a great accessory, adding that certain extra sporting image - especially with chrome wire wheels. Note that in some countries replacing 'safety' octagonal spinners with projecting eared types may infringe local safety regulations; it may be prudent to check before ordering.

*Easy to fit.* Just don't forget a little bit of grease on the threads and hub splines from time to time.

*Basic hand tools required.* Just the hammer from the car's tool kit.
