

FABSIL WATER REPELLANT

The renowned Grangers Fabsil aerosol silicone proofer is a highly effective silicone-based water repellent treatment for all kinds of soft top fabric. Easily applied by spray application, it dries to an odourless and colourless finish.

Especially effective on double duck and mohair soft tops, Fabsil is also highly recommended for all kinds of tent, tarpaulin, canopies and awning fabrics. Another of those really useful cans for the garage shelf.

Grangers, established in 1937, have always specialised in waterproofing products to protect and restore all kinds of outdoor-use fabrics. Fabsil replicates the water-repellency applied to these fabrics when they were new. In other words, re-applying the original treatment. As Grangers put it, 'Original Performance Restored'.

Easy to use. Brush off any loose dirt and clean soft top with appropriate soft top cleaner, following manufacturer's instructions. Allow to dry naturally. Shake Fabsil aerosol and, after applying to a small test area first, spray evenly over fabric from a distance of 10 to 15cm. Wipe over with clean, soft cloth to smooth and rub in any droplets. Allow to dry naturally.

Basic hand tools required. Clean, soft cloth for finishing.
