

MGB & MGC WORKS STYLE HARDTOP

Without doubt the original factory 'Works' hardtop was the most stylish design to complement MGB and MGC models. MGOC Spares offer this good reproduction, in either black or white gloss finish. It features a flock interior lining, includes all fixings and fits all MGB and MGC roadster models.

There are few pleasures to match the delights of driving an open sports car on a fine day, but in the depths of winter when the weather is cold driving a soft top car even with the hood up can become a hardship. By fitting your MGB or MGC with a hardtop you can have the best of both worlds, an open car for the summer and a closed coupe for the winter. A hardtop is also a very practical option as it will provide you with extra comfort in combination with improved security.

Please note that hardtops are sold for personal collection from Club H.Q. only.

Note - fitting a new hardtop for the first time takes experience and patience to align it correctly.

Moderate skills required. Fitting the hardtop is not complex, but alignment of a new hardtop for the first time takes a lot of patience. Fitting and removal in the future, once the hardtop has settled into the car's shape, is much easier and quicker.

FITTING INSTRUCTIONS

Basic hand tools required. 7/16" and 1/2" AF spanners and sockets.
