

MGA WORKS STYLE HARDTOP

Great looking reproduction of the original factory 'Works' hardtop, complementing the curvaceous design of the MGA. Finished in either black or white gloss finish. Features a flock interior lining, includes all fixings for installation and fits all MGA Roadster models.

There are few pleasures to match the delights of driving an open sports car on a fine day, but in the depths of winter when the weather is cold driving a soft top car even with the hood up can become a hardship. By fitting your MGA with a hardtop you can have the best of both worlds, an open car for the summer and a closed coupe for the winter. A hardtop is also a very practical option as it will provide you with extra comfort in combination with improved security.

Please note that hardtops are sold for personal collection from Club H.Q. only.

Note - fitting a new hardtop for the first time takes experience and patience to align it correctly.

Moderate skills required. Fitting the hardtop is not complex, but alignment of a new hardtop for the first time takes a lot of patience. Fitting and removal in the future, once the hardtop has settled into the car's shape, is much easier and quicker.

Basic hand tools required. 7/16" and 1/2" AF spanners and sockets.
