DOUBLE DUCK TONNEAU COVERS (NO HEADRESTS)

Full length tonneau covers in black double duck fabric, fitting right hand drive models of Midget and Sprite without headrest equipped seats. Available for a choice of two models: 1964-66 1098cc wind up window cars, or 1967 onwards 1275/1500cc cars. Please contact MGOC Spares for ordering details on left hand drive tonneau covers.

Double duck - two layers of automotive grade canvas sandwiching a weatherproof rubberised layer - gives an affordable upmarket natural fabric appearance.

Club tonneau covers for 1967 onwards 1275/1500cc models are supplied with most fasteners pre-fitted and all other fastener holes punched by the manufacturer, ready to fit the remaining fasteners. 1967-68 models may require an extra pair of Tenax fasteners to be ordered (they had 8, all later cars having 6). For pre-1967 models, tonneau covers are supplied with all fasteners unfitted, allowing for the slight differences sometimes in fastener positions on earlier cars.

Easy to fit. For a 1967 onwards tonneau cover, simply attach the remaining fasteners and clip the cover to the car. Tonneau covers for earlier cars require all of the fasteners to be fitted first - an easy task, following the fitting instructions.

FITTING INSTRUCTIONS

Basic hand tools required. For pre-1967 models: craft knife, chalk and tape measure, craft knife, punch pliers (optional), small flat blade screwdriver, Tenax key (optional). For 1967 onwards models: small flat blade screwdriver, Tenax key (optional).
