DOUBLE DUCK HALF TONNEAU COVER 1967-79

Half tonneau cover (otherwise known as a hood cover) in black double duck fabric, fitting all 1967-79 1275/1500cc Midgets and Sprites. Double duck - two layers of automotive grade canvas sandwiching a weatherproof rubberised layer - gives an affordable upmarket natural fabric appearance.

Club half tonneau covers for Midgets and Sprites are supplied complete with most fasteners pre-fitted and all other fastener holes pre-punched by the manufacturer using precision jigs, ready to fit the remaining fasteners and fit the cover straight on the car. 1967-68 models may require an extra pair of Tenax fasteners to be ordered (they had 8, all later cars having 6).

True to its alternative 'hood cover' name, the half tonneau cover makes a very neat and tidy way of finishing the rear of the cockpit when the hood is folded in the down position, rather than going to the bother of fitting a full tonneau cover with tonneau cover sticks.

Easy to fit. Simply attach the remaining unfitted fasteners to the half tonneau cover. Then it's just a matter of folding your hood and using the hood's rear fixing points to attach the cover. Absolutely simple.

Basic hand tools required. Small flat blade screwdriver to attach fasteners, Tenax key (optional).
