

RHINO COVERS

With versions for fitting to MG roadsters with the hood erected or hardtop fitted or to GT models, a Rhino cover fits over the car to completely cover all hood, roof and window areas, thereby protecting from frost, bird lime on hoods, fading and water ingress.

Rhino covers are tailored specifically for MGB and MGC roadsters, MGB GTs and MGC GTs or Midgets and Sprites. The covers are made from heavy duty, completely waterproof material with sewn-in rubber bungee cord that simply anchors to the wheel arches or wheels without fear of paintwork damage.

The MGB roadster and Midget covers are particularly effective for protecting quality hooding fabrics such as double duck and mohair.

Easy to fit. A Rhino cover simply clips to the wheels or wheel arches of your MG with its soft rubberised straps. Easy for one person to fit, even easier for two.

No tools required.
