

## PERSPEX WINDSTOPS (MGB OR MIDGET)

Highly effective in shielding the car's occupants from wind buffeting and backdraft, windstops have become extremely popular since the product's inception a few years ago.

The perspex windstop fits unobtrusively behind the seats and still allows use of a half tonneau cover (hood cover) on MGs with folding hoods, although MGB half tonneau covers will require slight modification. Manufactured from clear polycarbonate and available in MGB/MGC and 1967 onwards Midget/Sprite versions, the windstop stores in its own storage bag in the boot when not in use; however the Midget/Sprite windstop can be left in position with the hood erected, if desired.

If you don't like wearing a cap or hat while driving and find the only drawbacks of the otherwise exhilarating open-top motoring style are hair lashing at your eyes and both you and your partner suffering from 'bad hair days' every time you get out of the car, a windstop is the perfect solution.

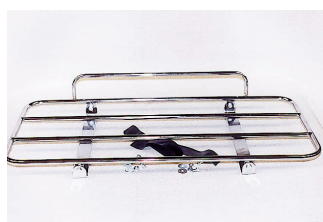

*Easy to fit.* Specially designed fastening brackets, straps and fasteners are all included along with fitting instructions. The complete installation may be effected in a matter of minutes.

**FITTING INSTRUCTIONS**

*Basic hand tools required.* 3mm dia. drill for fitting securing pins to body on both MGB and Midget/Sprite versions. 2.5mm dia. drill for skirt snap fasteners on MGB version. Spanners and/or socket set to fit retaining sockets to hood frame mountings on Midget/Sprite version.
