

CARPET CLIP SET MGB GT

Pack of sixteen pairs of 'Veltex' carpet clips, sufficient to secure the removeable carpet sections in any MGB GT.

The original carpet fastening item favoured for many years by the majority of the British motor industry, the Veltex clip is strong and durable, tolerating years of abuse from shoe heels etc.

The very useful Veltex clip may be used in many other cars and for many different applications - it's often used to prevent rubber or carpet overmats from moving and fouling pedals, or even in the home to secure 'runner' carpets in hallways!

01954 231318

Easy to fit. Using the carpet fixing studs in the car's floor as a guide, mark with chalk where each Veltex clip should be on the carpet. Push the spiked ring through the carpet from the top. From under the carpet, fit the clinch plate of the clip over the protruding spikes. Trap the clinch plate in place under the carpet by bending the spikes outwards with pliers.

Basic hand tools required. Chalk to mark intended clip position, plus pliers to fasten clip in place.
