

REAR SEAT FOAM SET MGB GT

An exact reproduction of the original pair of seat foams used in the rear bench seat in MGB GTs built between 1973 and 1980, this rear seat foam set also works perfectly in earlier 1965-72 GT rear seats.

An absolute must when reupholstering seats with new Club covers - tired, sagging old seat foams would simply not do them justice and would fail to offer the correct support for the seats' occupants. Additionally, new foams exactly match the profile of new seat covers, holding them smartly taut and making the job of seat reupholstery that much easier.

Easy to fit. Seat foams are simple to fit to the seat backing boards - aerosol upholstery adhesive is the ideal method, following the instructions on the can. For the remainder of the seat reupholstery task, please refer to the fitting instructions.

FITTING INSTRUCTIONS

Basic hand tools required. Paint scraper or similar to remove old foams and glue residue from the seat backing boards, plus aerosol upholstery adhesive to attach the new foams.
