

CARBON FIBRE TAX DISC HOLDER

Carbon fibre is the very latest medium for MG interiors. A constantly changing chequered pattern is created by light reflecting through the carbon fibre laminated weave, making the pattern appear alive beneath the surface. Lesser printed or 'carbon fibre effect' items do not display this intriguing feature - note that Club carbon fibre products are made from genuine carbon fibre.

The design of the Club carbon fibre tax disc holder ensures that your valuable tax disc is safely secured away from nimble-fingered thieves and blustery wind (if you haven't had to suddenly lurch across to catch a tax disc ripped from the windscreen by the wind in a convertible car, you haven't really lived) and is held to the windscreen by concealed fixing pads.

While of course the carbon fibre tax disc holder may be used in any car old or new, it's shown to best effect in an MG kitted out with the Club carbon fibre dash, door cappings and console (well, we would say that, wouldn't we?).

Easy to fit. Concealed fixing pads permanently hold the tax disc holder to the windscreen, while the tax disc is inserted by undoing the cap screws to remove the backing.

No tools required. Except for the allen key (supplied with the tax disc) to undo the cap screws.
