

CARBON FIBRE FRONT DOOR CAPPINGS MGB GT (PAIR)

Beautifully finished in carbon fibre, this pair of door cappings are painstakingly shaped to fit any MGB GT or MGC GT. They make the perfect accompaniment to the Club carbon fibre dash, console and door pulls - they also look great with a Club Classic leather panel kit or a full leather interior upgrade.

Carbon fibre is the very latest medium for MG interiors. A constantly changing chequered pattern is created by light reflecting through the carbon fibre laminated weave, making the pattern appear alive beneath the surface. A polymer lacquer finish creates depth and sheen.

The door cappings are shown to best effect when fitted with new chrome brackets, while also purchasing the Club capping bracket screw set gives an MGB/C GT owner everything they need to fit the cappings to the doors without the hassle of having to work out what's required and order all the parts separately - see the recommendations below.

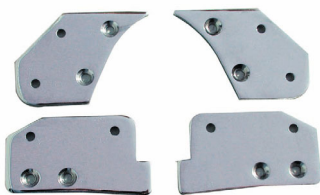

Easy to fit. Even easier if you use nice new screws from the Club capping bracket screw set. Simply screw the brackets to the back of each capping and then screw the cappings to the door shells.

Basic hand tools required. A set of crosshead screwdrivers, plus a drill to make screw holes in new doors (if required).
