

CARBON FIBRE DOOR CAPPINGS MIDGET (PAIR)

Beautifully finished in carbon fibre, this pair of door cappings are painstakingly shaped to fit 1972 onwards Midgets, making the perfect accompaniment to the Club carbon fibre dash (available for 1972-77 and 1978-79 models) - they also look great with a Club Classic leather panel kit or a full leather interior upgrade.

The cappings will of course also fit all Midgets and Sprites from 1964-71, but be aware that a matching carbon fibre dash for these earlier models is not currently available.

Carbon fibre is the very latest medium for MG interiors. A constantly changing chequered pattern is created by light reflecting through the carbon fibre laminated weave, making the pattern appear alive beneath the surface. A polymer lacquer finish creates depth and sheen.

Easy to fit. The carbon fibre cappings are held to the door shells by threaded studs and nuts, like the original cappings. The only difficulty is squeezing your hand and a spanner inside the door to tighten the nuts when the drop glass is in the door. It follows that if you have the opportunity to fit the cappings before the glass (e.g. when building up a new door), it makes the job much less fiddly.

Basic hand tools required. A combination spanner (open one end, ring at the other) in either 5/16" AF or 3/8" AF size, depending on the type of nut used.
