

STANDARD BOOT CARPET SET MGB ROADSTER

Budget priced four piece boot carpet set, with neatly tailored and bound main sections to cover the boot floor area and the spare wheel. Wide choice of seven colours available.

Quick make-over for the boot area of the car - hides scratched and worn paintwork on the boot floor, gives the boot something of a luxurious air and gives you a compartment you don't mind putting your valuables and precious belongings in, without fear of getting them damaged or dirty. Additionally, a boot carpet set significantly reduces cabin noise. A great accessory for your car.

The floor carpet simply slips into place and is held there by the spare wheel and fuel tank filler pipe - makes it easy to lift out to brush down or vacuum if necessary. With an elasticated lower seam the spare wheel cover secures over the wheel easily and remains in place until you want to remove it. Also included in the MGB roadster standard boot carpet set are precision die-cut pieces to cover the structural rails in the boot.

Easy to fit. The main boot floor carpet and spare wheel cover simply slip into place. The rail covering pieces are secured with upholstery adhesive. Gently coaxing these pieces around the contours of the rails may appear a little daunting at first, but it's actually easy once you start - just take your time.

Basic hand tools required. Upholstery adhesive (aerosol or brush-on) required for the rail pieces, plus possibly a craft knife to carry out any slight adjustment while contouring the rail covering pieces that might require it.
