

LEATHER CONSOLE ARMREST MGB

Padded centre console armrest trimmed in upmarket luxury soft leather for MGB and MGB GT models, to replace that scuffed and weary original vinyl item occupying pride of place in the centre of your car.

Sold in assembled condition - no need to struggle to recover your own armrest - but without the associated hinge and catch, which are available as separate items if the originals in your car are similarly tired or broken.

The leather console armrest is available in original black, plus an amazing total of twenty-two other colour schemes (fourteen of which feature contrasting piping). That's enough choice to ensure the leather armrest matches with - and becomes an essential part of - any Club leather interior.

Easy to fit. Three screws secure the rear of the armrest to the centre console hinge, two screws hold the plate retaining the cubby box catch at the front of the armrest.

Basic hand tools required. A set of crosshead screwdrivers.
