

## LEATHER CONSOLE WITH CARBON FIBRE MGB 1968-76

High-tech carbon fibre development of the popular Club design one-piece leather trimmed centre console, featuring switch and radio mountings appropriate for 1972-76 MGBs, MGB GTs and V8s. Also makes a great upgrade for 1968-71 MGBs and MGCs, providing a neat installation for accessory lamp switches etc. The console is not suitable for automatic models without modification.

Beautifully crafted in hand-finished leather with carbon fibre switch/radio and gear lever panels. Armrest and ashtray are not included, but may be fitted if desired. The leather console with carbon fibre panels is available in eight colours, matching other Club leather trim products.

Carbon fibre is the very latest medium for MG interiors. A constantly changing chequered pattern is created by light reflecting through the carbon fibre laminated weave, making the pattern appear alive beneath the surface. A polymer lacquer finish creates depth and sheen. Carbon fibre dashboards and door cappings are also available to complete the ultimate sporting effect.

*Easy to fit.* Secures to the under-dash reinforcement with four self tapping screws and clips, the centre is held to the tunnel by the gear lever gaiter retaining ring and four screws, while the cubby box is held to the tunnel by a single screw.

### FITTING INSTRUCTIONS

*Basic hand tools required.* A set of crosshead screwdrivers, plus possibly a pad and pencil to note down wiring positions on terminals of electrical equipment being transferred to the new console, if required.
