LEATHER CONSOLE WITH CARBON FIBRE MGB 1976-80

High-tech carbon fibre development of the popular Club design one-piece leather trimmed centre console, featuring switch and radio mountings appropriate for MGBs and MGB GTs built between 1976 and 1980. Provides an ergonomic place to site switches for accessories such as auxilliary lamps, electric windows, heated seats etc.

Beautifully crafted in hand-finished leather with carbon fibre switch/radio and gear lever panels. Armrest and ashtray are not included, but may be fitted if desired. The leather console with carbon fibre panels is available in four colours, matching other Club leather trim products.

Carbon fibre is the very latest medium for MG interiors. A constantly changing chequered pattern is created by light reflecting through the carbon fibre laminated weave, making the pattern appear alive beneath the surface. A polymer lacquer finish creates depth and sheen. Carbon fibre dashboards and door cappings are also available to complete the ultimate sporting effect.

Easy to fit. Secures to the under-dash reinforcement with four self tapping screws and clips, the centre is held to the tunnel by the gear lever gaiter retaining ring and four screws, while the cubby box is held to the tunnel by a single screw.

FITTING INSTRUCTIONS

Basic hand tools required. A set of crosshead screwdrivers, plus possibly a pad and pencil to note down wiring positions on terminals of electrical equipment being transferred to the new console, if required. An awl and box spanner (or deep socket) will be required to deal with heater knobs and rotary controls respectively.
