

## DOOR CAPPING COVERING KIT MIDGET & SPRITE

Pair of cut vinyl material strips to recover the aluminium door cappings in all Midget and Sprite models from 1964 onwards (all wind-up window cars).

Available in a range of eight vinyl colours to match original trim panel colours and Club special panel colours, the door capping covering kit is supplied separately as shown here but is alternatively included as part of the Midget/Sprite Classic panel set and supplementary panel set.

*Moderate skills required.* Fit with upholstery adhesive - allow plenty of time when recovering door cappings - patience is required to get them looking right. Carry out a couple of 'dry runs' without adhesive beforehand to practise how to do it. Ensure all traces of old adhesive is removed when stripping old vinyl from aluminium cappings - otherwise it will show as bumps in the surface of the new vinyl.

*Basic hand tools required.* Upholstery adhesive and a craft knife for any trimming required. A pair of upholstery pliers would be helpful in pulling glued vinyl taut over the door cappings.
