

DOOR CAPPING BRACKET SCREWS MGB & GT (CAR SET)

Set of sixteen screws, chrome or zinc plated as appropriate, sufficient to fix all four door capping brackets in your MGB or MGC roadster or GT to the doors and door cappings.

Excellent value, easy way to ensure you have all the correct, new and untarnished screws for the job. Other hardware kits that would come in very handy whilst retrimming your MGB include trim panel screw and cup washer kits in bright or black finish for roadsters or GTs, plus a screw kit for the door seal retainer strips or door threshold plates and a car set of 'Veltex' carpet fasteners (see recommendations below).

Easy to fit. Or rather, they make new door cappings easy to fit.

Basic hand tools required. A set of crosshead screwdrivers, plus a drill to make screw holes in new doors (if required).
