## VELOUR HEADREST COVER 'D' SHAPE

Luxury velour headrest cover, supplied singly, precision-cut and assembled to make for the easiest possible fitting onto the classic 'D' shaped headrest found originally in early to mid-1970s MGBs and Midgets.

Designed as a perfect match for the Club range of velour seat covers for MGB, MGB GT and Midget models, these headrest covers are available in black, brown or navy (the latter in limited stocks only).

*Easy to fit.* Remove the old headrest cover carefully, noting the tucks and folds that gather up the material around the cover opening, held by the retaining plate at the top of the stalk. Keep the old cover to one side as a guide for reassembly. Slip the new cover over the headrest, gather the edges around the opening and secure with the retaining plate.

*Basic hand tools required.* The only tool that should be necessary is a crosshead screwdriver to remove and subsequently replace the retaining plate.
