

EXCHANGE LEATHER SEATS MGB, MIDGET & MGA

MGOC Spares offer complete exchange leather seat assemblies, in either original style for MGAs, earlier MGBs, Midgets and Sprites or as a great luxurious upgrade for later MGBs and Midgets. It's an easy way to get beautifully reupholstered seats, taking away any worries about assembling seats yourself and guaranteeing the top quality professional finish your MG interior deserves.

Exchange leather seat assemblies are supplied in pairs, either utilising stock refurbished seat frames (MGB and Midget) or refurbishing your own seat frames (MGA). Either way, you will be buying tautly upholstered seats with new leather covers, foams and either diaphragms, webbing or seat bases (as appropriate). Seats are not supplied with runners - please remove runners for reuse before giving us your old seats. Note MGB and Midget seats are not supplied with headrests.

A wide range of colour schemes are available as standard; however non-standard colours may be specified instead, at additional cost. Please contact MGOC Spares for special colour requests.

Easy to fit. Simply bolt your upper runners onto the seats, slide on the lower runners and then bolt the lower runners to the floor. Could hardly be easier - perfect seats, totally painlessly. During the process, don't forget to replace any self-locking Nyloc nuts that you undo with new ones.

Basic hand tools required. Just an AF socket set and spanners, plus (depending on model) a crosshead screwdriver.
