

DASH TOP COVERING KIT MGB

DIY retrim kit, containing vinyl to recover the dash crash rail and dash top/scuttle, new foam for the crash rail and a length of piping to finish the top edge of the crash rail.

Available in twelve colour schemes, including three with contrasting piping, to complement other Club trim products. For all MGBs and MGCs except 1968 onwards models with safety 'pillow' dash.

If you're concerned about your abilities and quake at the prospect of retrimming the dash crash rail to a smooth, professional finish, note that the Club also offers the crash rail as a complete new assembly, if you prefer. Alternatively, seek out your local automotive trimmer who will be able to take the kit and do the job for you.

Moderate skills required. Applying vinyl to the dash top/scuttle panel is easy (see fitting instructions). Fitting the new foam and recovering the crash rail demands dexterity and patience - a new crash rail assembly is available as an alternative..

FITTING INSTRUCTIONS

Basic hand tools required. Upholstery adhesive, clean cloth to smooth out air bubbles, craft knife, plus a staple gun to attach vinyl and piping to the crash rail.
