

CLASSIC PANEL SET MGB GT 1970 ON & GT V8

Immensely popular 'retro' panel set designed to backdate 1970s GT interiors to the classic 1960s twin-piped MG style. Also appropriate for 1968-69 models fitted with replacement doors with piercings allowing use of plastic panel clips.

Nine piece panel set includes pair of door panels, pair of outer footwell sides, pair of rear quarter panels, pair of tailgate panels and radio console panel. Huge range of sixteen colour schemes available including seven with contrasting colour piping - a choice that virtually guarantees any desired colour scheme can be satisfied!

Door panel fabric not pierced for window winder handles, permitting use of electric window conversions without the need for unsightly plugs in redundant window winder holes. Alternatively the fabric may be simply pierced for manual winder handle fitment.

Easy to fit. Door panels fitted with plastic panel clips. All other panels fitted with screws and cup washers. Screw holes made with bradawl required as appropriate in some panels.

FITTING INSTRUCTIONS

Basic hand tools required. Cross-head screw driver set and bradawl. Small hand drill required if new screw holes are required in body.
