

## WALNUT DOOR CAPPINGS MIDGET (PAIR)

Beautifully finished in burr walnut veneer, this pair of door cappings are painstakingly shaped to fit 1972 onwards Midgets, making the perfect accompaniment to the Club burr walnut dash (available for 1972-77 and 1978-79 models), walnut gear knob and steering wheels - they also look great with a Club Classic leather panel kit or a full leather interior upgrade.

The cappings will of course also fit all Midgets and Sprites from 1964-71, but be aware that a matching walnut dash for these earlier models is not currently available.

Each pair of burr walnut door cappings is manufactured from hand selected veneer to ensure consistent burr pattern throughout. A deep protective lacquer reflects the beauty of the veneer.

*Easy to fit.* The walnut cappings are held to the door shells by threaded studs and nuts, like the original cappings. The only difficulty is squeezing your hand and a spanner inside the door to tighten the nuts when the drop glass is in the door. It follows that if you have the opportunity to fit the cappings before the glass (e.g. when building up a new door), it makes the job much less fiddly.

*Basic hand tools required.* A combination spanner (open one end, ring at the other) in either 5/16" AF or 3/8" AF size, depending on the type of nut used.
