

## WALNUT SPEAKER CONSOLE PANEL MGB 1962-67

Make the radio speaker console in your 3 synchro MGB (i.e. 1962-67 models) a real feature of the interior with this burr walnut insert panel. Crafted to fit perfectly in the console and creating a great match with the MGB's traditionally styled speaker grille and bezel, the burr walnut insert panel is manufactured from hand selected veneer and finished with a deep protective lacquer to reflect the beauty of the veneer.

Note that the console itself, plus the speaker grille and bezel, are not supplied with the walnut panel but are available separately - in fact, why not also go for the Club's own leather covered console, to complete the effect?

The burr walnut speaker console panel is a perfect accompaniment to the Club burr walnut dash, door cappings and door pulls - also looks great with a Club Classic leather panel kit or a full leather interior upgrade.

*Easy to fit.* The walnut panel is clamped to the console by the speaker bezel, which fits to the console with four nuts and washers (don't overtighten the nuts and crack the console). It's easier to remove the console from the car to get access to the nuts - a very simple and quick operation.

*Basic hand tools required.* A small open ended spanner is required for the speaker bezel nuts, while a crosshead screwdriver will remove and refit the four console retaining screws.
